Why gamble with your mechanical linear motion solution?

By Specialty Motions Inc. 2009-11-24

"At Specialty Motions, Inc., we pride ourselves with offering high-quality mechanical motion solutions at extremely competitive rates."

For_Immediate_Release:

Why gamble with your mechanical motion solution?

In today's difficult economy, the most important objective is to ensure you are receiving the right product that meets both your budget and your application needs.

At Specialty Motions, Inc., we pride ourselves with offering high-quality mechanical motion solutions at extremely competitive rates:

We offer a wide range of multi-axis linear actuators:
-Profile Rail Linear Actuators including our XLA™ 15 and XLA™ 9, and our MP™ Series (miniature precision).
-Sliding Element Linear Actuators including our Slick Stick™, ECO33™, ECO06™, and TwinLite™.
-Round Rail Linear Actuators including our Steady Rail™ Linear Stages both driven and manual, and our Simple Slide™ Linear Tables.
-Short Travel Rolling Element Linear Actuators including our X-TREME™ nano-precision motorized cross roller table, and our Easy Slide™ family of Ball Slides and Cross Roller Slides.

We also offer preconfigured linear actuator packages with a variety of control options including remote control, foot pedal control, joystick control and our unique U-Control™ line of controls which allows everything from simple single axis forward/reverse actuation to multi-axis variable speed control.

We are also a master distributor of motion control components from the top names in the industry including: *NB, Thomson, NSK, IKO, Applied Motion, igus®, Rexroth Bosch* and many others. We have it all: linear bushings, linear pillow blocks, stepper motors, servo motors, drivers and controllers, shafting including our own Hardcoat™ aluminum shafting, support rails, ball splines, profile guide rails, lead screws and ball screws, and many more.

Contact us today toll-free at (800) 238-3411see on how Specialty Motions, Inc. can solve your problems.

SMI™ - Mechanical Motion Solutions from A to X, Y, & Z! ™
